REMOTE SENSING IMAGE ANALYSIS

Big data and Artificial Intelligence techniques for the automatic processing of remote sensing images, and their use in defence, are gaining importance every day. Learn from the basics to some advanced techniques in this 30-hours course.

Focused to: industry upskilling and re-skilling, and university master students

- Scheduled May 23th to to June 9th (16:00-18:00 & 16:00-19:00)
- Entry requirementes: Basic signal processing, basic computer programming, basic mathematics
- Registration and additional information: https://assets-plus.eu/education-training/data-science-for-defence-remote-sensing-image-analysis-course/
- EQF level: 7
- Price: free
